CloudBlue

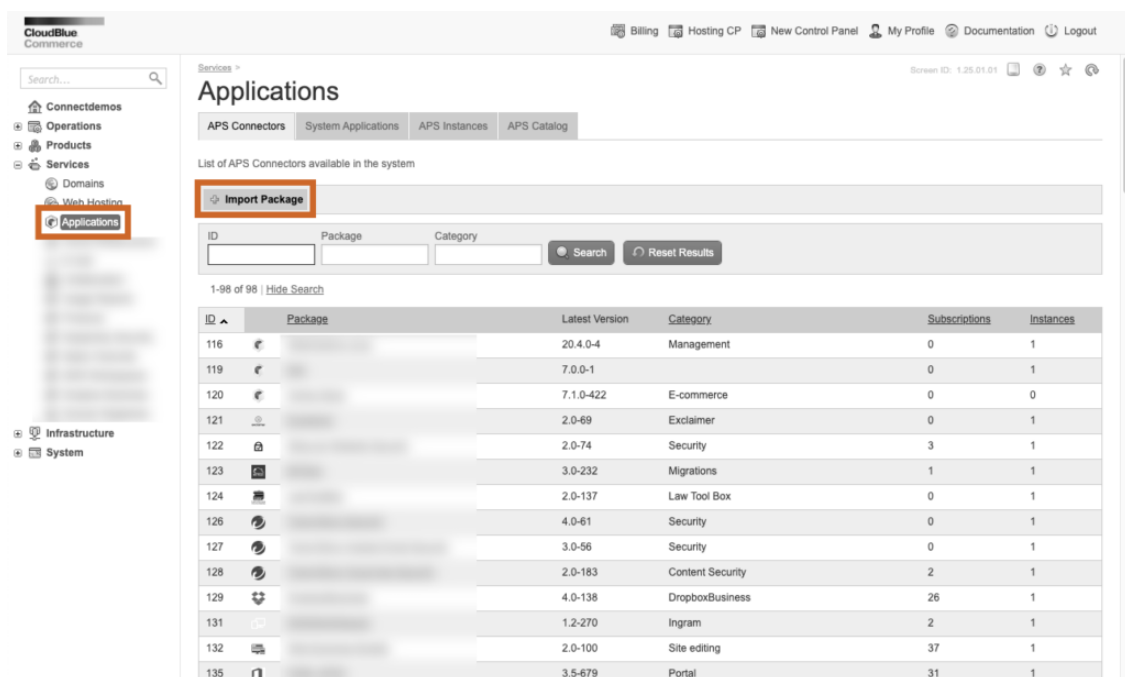

In order to run on CloudBlue Commerce **21.0 and earlier** (not required for versions for patched 21 and above), Connect requires a special APS application package called “**Abstract Types**” installed into the system as described below.

Download the Package

Download the **abstract types package version 21.3.0.3095** application package to your local drive by clicking at the “**Download**” button below:

Import the Package

Follow the instructions below to successfully import the downloaded application package to the CloudBlue Commerce platform:

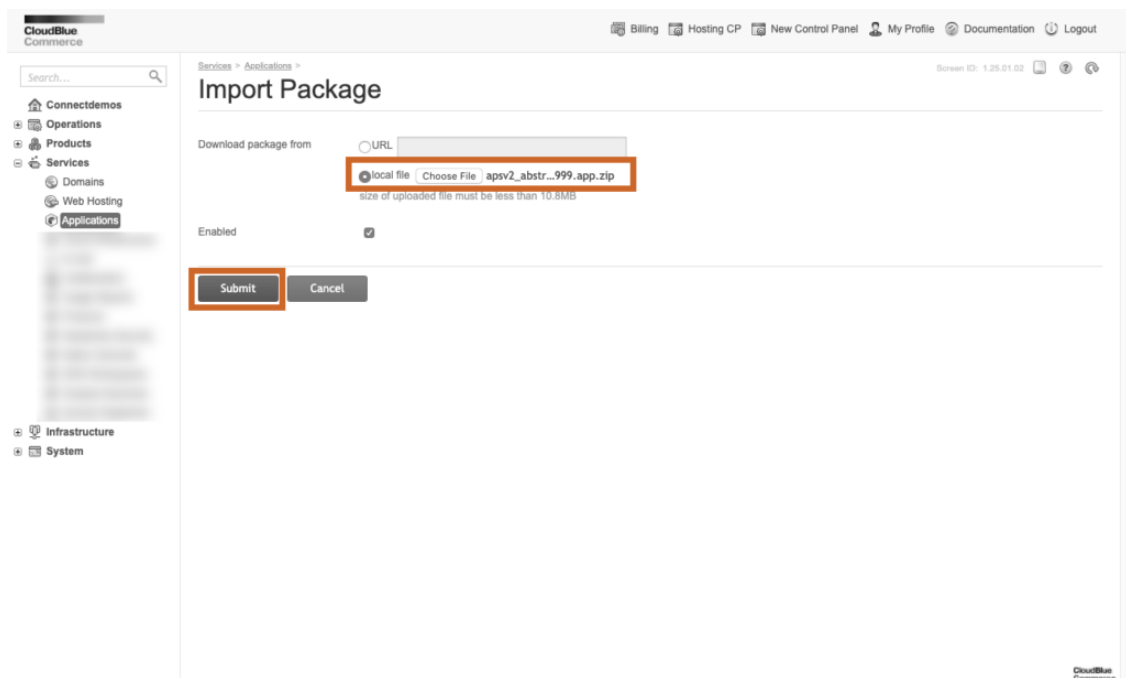

The screenshot shows the CloudBlue Commerce interface. On the left is a navigation menu with categories like Connectdemos, Operations, Products, Services, Domains, Web Hosting, and Applications (which is highlighted with a red box). The main content area is titled 'Applications' and has tabs for 'APS Connectors', 'System Applications', 'APS Instances', and 'APS Catalog'. Below the tabs, there's a section 'List of APS Connectors available in the system' with an 'Import Package' button highlighted by a red box. Below this is a search bar with fields for ID, Package, and Category, and buttons for 'Search' and 'Reset Results'. At the bottom, there's a table listing various application packages.
