Legacy CLI Tool

This article has been generated from the online version of the catalog and might be out of date. Please, make sure to always refer to the online version of the catalog for the up-to-date information.

Auto-generated at April 30, 2026

The **apsconnectcli** is a **legacy** command line tool helps Providers with product lifecycle automation in the CloudBlue Commerce.

Warning: This tool is going to be discontinued as of January 2021.

apsconnectcli is a part of the CloudBlue Connect Extension for the CloudBlue Commerce, as illustrated by the following diagram:

Providers need to use this tool to initialize Hub connectivity and install product packages. Linux and MacOS environments are supported. For details about the tool please refer to its GitHub page:

<https://github.com/cloudblue/apsconnect-cli>

for more information on this tool.

Install or Update

In order to install new or update existing version of the tool, please run the following command:

To check version of the tool, use the following command

CB Commerce Instance Connectivity

You'll need to have an access to the CB Commerce API (xmlrpc). Run the following command in order to connect to Provider's Hub:

Once configured, the tool can be used to install new versions of updates to the Product Packages as described in the Product APS Packages.
