Boomi Connector

The Boomi AtomSphere extension enables Vendors and Distributors to seamlessly integrate their line-of-business systems with CloudBlue Connect. The provided extension aims to facilitate and streamline fulfillment management operations without having to write a single line of code.

By using the provided Connect extension, you can build a Boomi application to link, transform and deliver required data from the CloudBlue Connect platform to your required system.

About Boomi AtomSphere

Boomi AtomSphere is an on-demand multi-tenant cloud integration platform for connecting cloud and on-premises applications and data. The platform enables customers to design cloud-based integration processes called Atoms and transfer data between cloud and on-premises applications.

By using the AtomSphere platform, you can create enterprise-grade, code-free integrations for your business processes. Thus, quickly eliminating the time and cost of developing and maintaining individually hand-coded point-to-point connections.

Developers and integrators can take advantage of the intuitive drag and drop visual designer which encompasses a comprehensive library of pre-built APIs, connectors, and workflow templates. The AtomSphere platform is fully scalable and it is backed by a Boomi support team and robust service level agreements.

Connector Ecosystem

AtomSphere integrations are designed to visually represent configured workflows. This allows users to quickly build integration pipelines and manage complex data transformations. AtomSphere also offers lower initial costs and makes sophisticated application integration accessible to businesses of all sizes.

AtomSphere's architecture makes it suitable for many categories of use cases, including cloud to cloud, cloud to on-premise, and purely on-premise integration. You can easily transfer your data to a host of other technologies through the supported connectors on the drag-and-drop platform.
