Google Sheets Scenario

This article has been generated from the online version of the catalog and might be out of date. Please, make sure to always refer to the online version of the catalog for the up-to-date information.

Auto-generated at September 4, 2025

With Google Sheets, you can create and edit spreadsheets directly in your web browser—no special software is required. Multiple people can work simultaneously, you can see people’s changes as they make them, and every change is saved automatically.

This tool is perfect to automate flows to and from Cloudbase Connect in the easy way.

People use to work with spreadsheets, not only for calculation, also for managing data too.

This integration shows how when it’s filled a Purchase Request data in a Google Spreadsheet row, the Purchase Request is created in Cloudbase Connect.

After the creation, updates the google spreadsheet row with the Purchase Request ID and the status.

Modeling

It’s defined the workflow like:

ZAP Integration

To trigger the Zap, is configured a first step that triggers the second step, which creates the purchase request in Connect, after that the third step updates the Google Spreadsheet row with the PR Id and Status.

Zap detail

App: Google Sheet

Action: New Spreadsheet Row

App: Cloudbase Connect

Action: Create Asset Purchase Request (With Line Items Support)

App: Google Sheet

Action: Update Spreadsheet Row
