Modern employee directory software for Microsoft 365

Say goodbye to your clunky people directory. OneDirectory is a visual employee directory for Microsoft 365 that’s fun, fast and real easy to use, whether you’re an organization of 50 or 50,000.

Create a more connected workplace.

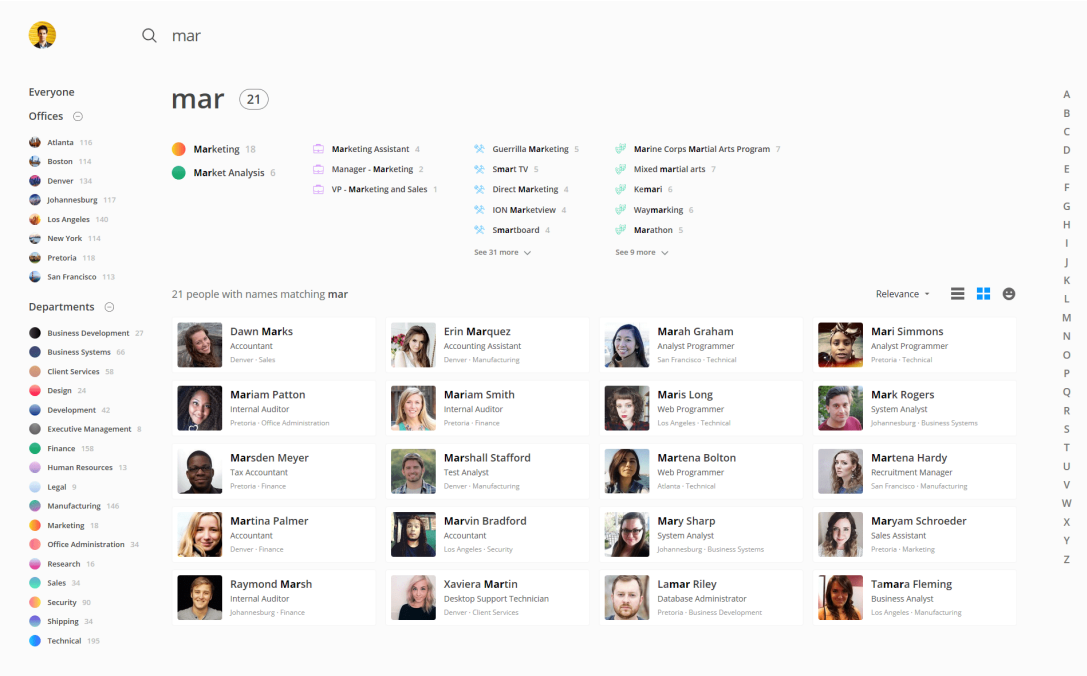

As your company grows it gets harder to know who’s who and where everyone fits in. **OneDirectory** helps your employees connect with each other and gain insight into your organization’s structure, in a way they haven’t been able to do before.

Find anyone in your company, fast.

OneDirectory brings fast, visual people search to Microsoft Office 365. Search your entire corporate directory in a split second. Then explore the results in powerful ways, with smart tags, group tiles, beautiful profile cards, and responsive list views. It’s unlike any employee directory software you’ve used before.

View your employee directory in different ways.

Put names to faces with large profile pics, get a high-level overview with profile cards, or flip to the list view to see more information and dig deeper into any field. Try it out below.

Flow through your company address book.

In OneDirectory, everything is clickable and opens instantly — names open profiles, offices & departments open team homepages, skills open a dedicated skill page.

Job titles show others with that title, Teams links open a Microsoft Teams chat. Maps expand, numbers dial, emails email (naturally) and it all happens without page reloads or waiting.

Don’t just take our word for it.
