## Modern employee directory software for Microsoft 365

Say goodbye to your clunky people directory. OneDirectory is a visual employee directory for Microsoft 365 that's fun, fast and real easy to use, whether you're an organization of 50 or 50,000.

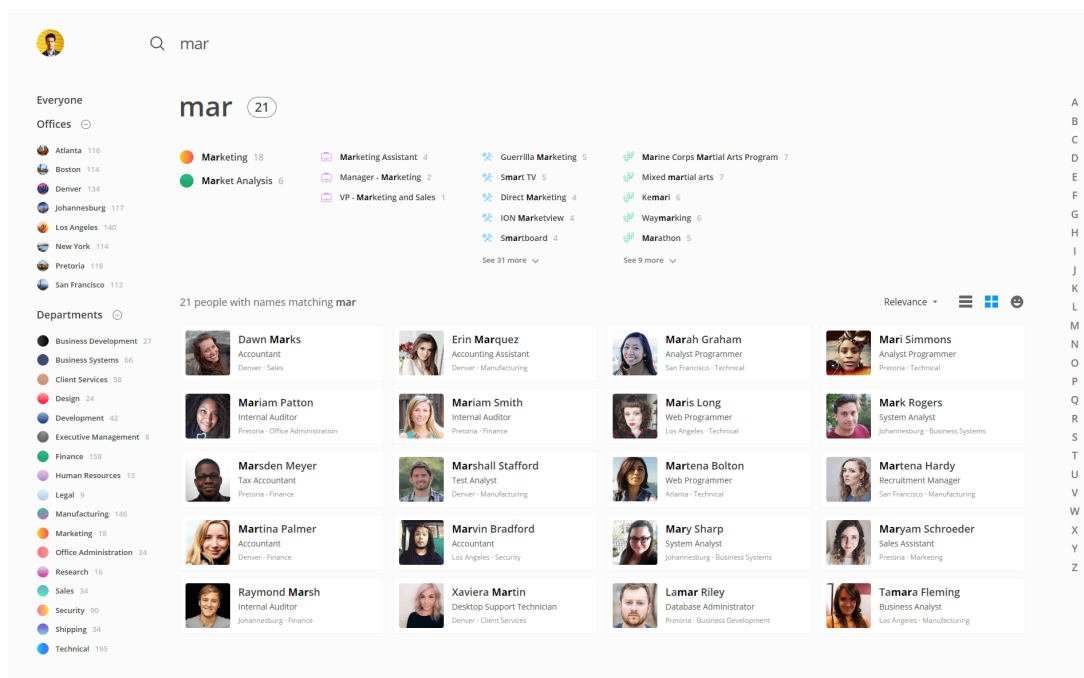

## Create a more connected workplace.

As your company grows it gets harder to know who's who and where everyone fits in. **OneDirectory** helps your employees connect with each other and gain insight into your organization's structure, in a way they haven't been able to do before.

## Find anyone in your company, fast.

OneDirectory brings fast, visual people search to Microsoft Office 365. Search your entire corporate directory in a split second. Then explore the results in powerful ways, with smart tags, group tiles, beautiful profile cards, and responsive list views. It's unlike any employee directory software you've used before.

The screenshot displays the OneDirectory Employee Directory interface. At the top, a search bar contains the text 'mar'. Below the search bar, the results are categorized into 'Everyone' and 'Offices'. The 'Offices' section lists various locations with their respective employee counts: Atlanta (116), Boston (114), Denver (134), Johannesburg (117), Los Angeles (140), New York (114), Pretoria (118), and San Francisco (113). The 'Departments' section lists various departments with their respective employee counts: Business Development (27), Business Systems (66), Client Services (58), Design (24), Development (42), Executive Management (8), Finance (155), Human Resources (13), Legal (9), Manufacturing (146), Marketing (18), Office Administration (34), Research (16), Sales (34), Security (90), Shipping (34), and Technical (195). The main section displays '21 people with names matching mar'. The results are shown in a grid of profile cards, each featuring a profile picture, name, and job title. The cards are arranged in a grid with 4 columns and 5 rows. The first row includes Dawn Marks (Accountant, Denver - Sales), Erin Marquez (Accounting Assistant, Denver - Manufacturing), Marah Graham (Analyst Programmer, San Francisco - Technical), and Mari Simmons (Analyst Programmer, Pretoria - Technical). The second row includes Mariam Patton (Internal Auditor, Pretoria - Office Administration), Mariam Smith (Internal Auditor, Pretoria - Finance), Maris Long (Web Programmer, Los Angeles - Technical), and Mark Rogers (System Analyst, Johannesburg - Business Systems). The third row includes Marsden Meyer (Tax Accountant, Pretoria - Finance), Marshall Stafford (Test Analyst, Denver - Manufacturing), Martena Bolton (Web Programmer, Atlanta - Technical), and Martena Hardy (Recruitment Manager, San Francisco - Manufacturing). The fourth row includes Martina Palmer (Accountant, Denver - Finance), Marvin Bradford (Accountant, Los Angeles - Security), Mary Sharp (System Analyst, Johannesburg - Business Systems), and Maryam Schroeder (Sales Assistant, Pretoria - Marketing). The fifth row includes Raymond Marsh (Internal Auditor, Johannesburg - Finance), Xavier Martin (Desktop Support Technician, Denver - Client Services), Lamar Riley (Database Administrator, Pretoria - Business Development), and Tamara Fleming (Business Analyst, Los Angeles - Manufacturing). On the right side of the interface, there is a vertical alphabetical index from A to Z. At the bottom right, there are icons for 'Relevance', 'List', and 'Grid' views.

## View your employee directory in different ways.

Put names to faces with large profile pics, get a high-level overview with profile cards, or flip to the list view to see more information and dig deeper into any field. Try it out below.

## Flow through your company address book.

In OneDirectory, everything is clickable and opens instantly — names open profiles, offices & departments open team homepages, skills open a dedicated skill page.

Job titles show others with that title, Teams links open a Microsoft Teams chat. Maps expand, numbers dial, emails email (naturally) and it all happens without page reloads or waiting.

## Don't just take our word for it.

People ♥ our employee directory software

**"OneDirectory is a visually appealing way for us to showcase our talented employees. I love being able to search and sort people in our agency."**

Joe Calabria, VP, Director Information Technology  
Concentric Health Experience
